

About CCC

Coconino Community College (CCC) is a community college serving Coconino County in the northern part of the U.S. state of Arizona. CCC is a college that serves more than 7,500 learners annually.

Region:

Flagstaff, AZ 86005, USA

Product:

Unified Mobile & Portal

Problem Statement:

The Luminis® platform approaching its end of life required an upgrade, at which point Coconino Community College decided to evaluate alternative options; with its core objective to replace the antiquated Luminis® solution. The institution sought a responsive web portal platform that would provide single sign-on to college services such as Ellucian® Banner, Canvas®, and Office365®; and facilitate communication among students, staff and faculty members.

Solution:

Unified mobile & portal provides out-of-the-box integration to Ellucian® Banner, Canvas®, Office365® & other enterprise applications; it enables staff and faculty members to communicate with the student population; provides data-driven insights into student behavior and facilitates student success outcomes.

Equipped with a cloud-based self-service interface, Unified Studio provides IT administrators the capacity to enable, disable or remove services and personalize student experience on the mobile app and web portal simultaneously, without writing a single-line-of-code.

Business Outcome:

MyCCC web portal has been a welcome addition to Coconino Community College, which has led to a massive upsurge in student engagement; it has helped the institution to communicate effectively with its constituents, with a documented 100% increase in student responses to institution supplied emails and awareness towards campus news & events.

Improving Student Engagement with Unified Portal

Coconino Community College provides its students, staff and faculty members with an immersive web portal experience and one-click access to Ellucian® Banner, Canvas® & Office365®.

Coconino Community College sought a robust web portal platform for its constituents when it chose Unified Portal, a solution that offers out-of-the-box integration to their SIS, LMS, Email and other enterprise applications, and facilitates campus-wide communication among students, staff and faculty members. Equipped with a cloud-based self-service interface, "Unified Studio" allows Coconino administrators to add, remove or modify services, and personalize their student experience on the MyCCC portal.

"MyCCC portal is now our one-stop shop. We tell all our students as soon as they have registered for a course, go to MyCCC, because that's really where they will get all their information. We have seen a huge increase in student communication through emails. Just from students using their Gmail, we saw more than a 50% increase in daily users." said Craig Darr, Portal Admin at Coconino Community College.

An immersive web portal platform that seamlessly integrates with Ellucian® Banner, Canvas®, Office365® and other enterprise applications, keeps constituents abreast of their academic and extracurricular life on campus; equips staff and faculty members with a targeted messaging system; provides data-driven insights on individual students at risk, and helps institutions to improve student success outcomes.

Testimonial:

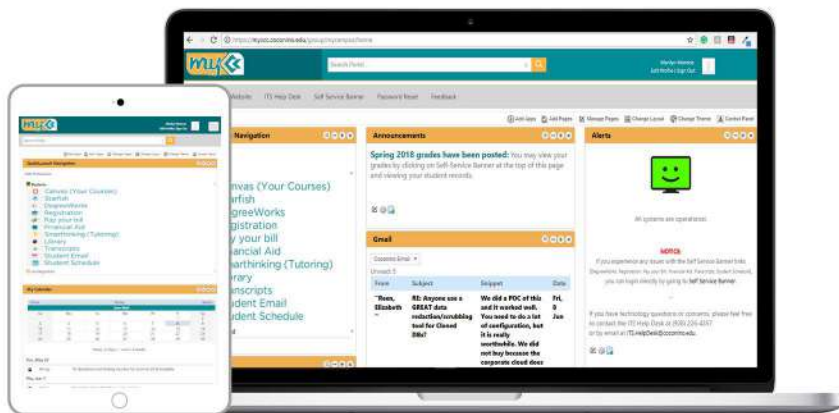

Less Work, More Flexibility:

Switching to Unified Portal has helped the institution save significant development efforts and overhead costs; while providing its students, staff and faculty members with a responsive web portal platform that enables one-click access to their SIS, LMS, Email, and other daily-use applications.

Leveraging Unified Studio, Coconino administrators can personalize their student experience, and add, modify or remove services without writing a single-line-of-code, hence demystifying common web portal management issues as they relate to onboarding several technical resources with varied skill sets and extensive project management.

"Unified Products and Services have helped us engage our students by providing solutions that meet our campus needs and gives us the much-needed value that Coconino Community College looks for in any product that we implement." said **Craig Darr, Portal Admin at Coconino Community College.**
